

# Activity 20 Prompt Sheet

Activity 20 | Topic 03 | C013 | Version v1.0

## Core prompt

Use the supplied high, base and low values to rank the ten variables by their effect on project cost or schedule. Produce tornado-chart data and one decision tree with expected monetary values, showing every calculation.

## Prepare the inputs

- Open mock-data.xlsx and review every field before copying selected rows.
- Replace bracketed placeholders with your agreed project context.
- Remove names, credentials, personal data and confidential business information.

## Prompt iteration

1. Run the core prompt and retain the first response.
2. Ask the model to list assumptions, missing information and uncertain calculations.
3. Correct the inputs and request a revised output in the required artifact format.
4. Record what changed and why the final human-corrected result is stronger.

## Verification checklist

- Recalculate every number independently.
- Open and verify every cited source.
- Reject invented facts, changed identifiers and unsupported conclusions.
- Check the final artifact against the activity success criterion.
- Keep final decisions and approvals with the human project owner.
